

HAZEL FAITH M. ASUNCION

SYSTEM DEVELOPER / WEB DEVELOPER/ PROGRAMMER

Philippines | hazelfaithasuncion@gmail.com | 09563781402 / 09098690548 | GitHub

PROFESSIONAL SUMMARY

Detail-oriented and proactive Computer Engineering graduate currently thriving as a System Developer / Programmer within the Production Engineering – Production Improvement Team at Sanyo Denki Philippines. Proven track record of designing, developing, and maintaining robust web systems to optimize factory operations and engineering workflows. Recognized for strong database skills (Top 10% on TestDome for SQL) and a continuous drive to master modern technologies including React, Node.js, and Kotlin.

TECHNICAL SKILLS

Programming Languages:	HTML/CSS, SQL, JavaScript, Kotlin (Learning)
Web Development:	ASPX (.NET), React (Advancing), Node.js (Advancing), Web Applications
Database Management:	Advanced SQL Queries & Database Design
Systems & Methodologies:	Production Improvement, Fabrication Request System, Machine Monitoring Systems, Inventory Control, Technical Troubleshooting

PROFESSIONAL EXPERIENCE

Sanyo Denki Philippines

System Developer / Programmer — Production Engineering, Production Improvement Team

August 2025 – Present

- Develop and deploy internal web applications aimed at automating factory processes and improving overall production efficiency.
- Key contributor to the EMS (Engineering Management Web System): assist in building and maintaining a comprehensive engineering tool used to monitor factory stocks, hardware inventory, component registration, and battery replacements.
- Implement modules within the EMS for real-time machine monitoring, program tracking, and machine trouble handling to reduce operational downtime.
- Design and maintain efficient database structures to support high-volume manufacturing data logs.

KEY PROJECTS

Fabrication Request System — Built a streamlined request and tracking application to manage custom fabrication orders within the production line.

Machine Preventive Maintenance System — Developed a system to schedule, track, and log routine machine maintenance, ensuring operational safety and reducing equipment failure.

Employee Tasking Web Application — Created a task management tool to assign, track, and optimize daily operations and workflows for team members.

EDUCATION

President Ramon Magsaysay State University

Bachelor of Science in Computer Engineering (BSCpE)

Graduated: 2025

CERTIFICATIONS & CONTINUOUS LEARNING

- **TestDome SQL Certification** — Ranked in the Top 10% of test-takers globally.
- **Professional Development** — Actively expanding expertise in Android Development (Kotlin) and full-stack web technologies (React and Node.js) to build highly scalable applications.
